

Irfan Sabrian

Frontend Developer

Summary

Frontend Developer with a passion for building responsive and user-friendly web interfaces. Experienced in using modern web technologies and frameworks to create engaging digital experiences. Currently expanding my expertise in data analytics and GIS, combining web development skills with spatial data visualization. My background in Informatics Engineering and electronics, along with hands-on experience in both software and hardware, allows me to approach problems from multiple perspectives and continuously learn new things.

Education

D3 Informatics Engineering at Politeknik Negeri Pontianak

2022 – Present

Currently pursuing a diploma in Informatics Engineering, focusing on software development, web, and data analytics.

Audio Video Engineering at SMK Negeri 4 Pontianak

July 2018 – March 2021

Studied the basics of electronics, audio/video systems, and technical troubleshooting.

Experience

Programmer at Diskominfo West Kalimantan Province

Informatics Application Division · Late 2024 – Early 2025

Worked as a programmer, developing and maintaining internal applications and supporting digital transformation at the West Kalimantan Provincial Communication and Information Office.

Internship at Smart Computer

Sales & Technician · 2020

Interned as a sales and computer technician, handling sales, assembly, repairs, and providing technical consultation to customers.

Projects

Official Website for Department of Communication and Information Technology of West Kalimantan Province
